castelatto

Unique ways of feeling.

castelatto

# castelatto

How do we perceive the world? Capturing stimuli and translating them into the form of sensations. All this takes place in small seconds, small fractions.

Feeling is being open to the new, opening the doors of the soul to liveliness. Because the ephemeral goes by, dissipates with the wind. But concrete is able to stand through time.

For this reason, feeling makes us unique, and the 2024 Castelatto collection is unique and vivid, as is the sensory. Discover the nostalgic brutality of the stone, feel the rusticity of the rammed earth, the delicacy of the material. Experiment with organic nuances and colors, from branco to terracotta, from fendi to sálvia.

Unique ways  
of feeling
